Zainab A.S.

Applied AI Engineer | Software Engineer | QA → AI | Building with LLMs · RAG · Vector Search · Generative AI
Greater Chicago Area

Summary

Applied AI Engineer turning complex data into intelligent systems — one pipeline at a time. Currently building a production-ready document intelligence system for real clinical workflows — ingesting messy scanned documents, extracting structured data with OCR, and making thousands of pages instantly searchable through RAG-powered LLM search. Real tools. Real data. Real impact. Backed by 4-5 years in Software Engineering and QA — bringing a production mindset to every AI system built. Because great AI doesn't just perform in demos. It delivers under pressure. Stack: Python · LLMs · RAG · LlamaIndex · FAISS · Chroma · Gemini API · Mistral · OCR · Vector Search · Streamlit Open to Applied AI & Generative AI Engineering roles — let's build something that matters.

Experience

Extern

PFIZER- AI Engineer Extern

April 2026 - Present (1 month)

United States

PFIZER Supply Chain Document Processing Externship

Building an end-to-end AI document intelligence system for clinical supply workflows at Pfizer.

- Parsing and extracting data from thousands of scanned documents using OCR pipelines (Tesseract, PaddleOCR, EasyOCR)
- Building RAG pipelines with LlamaIndex, FAISS, and Chroma for intelligent semantic search
- Implementing LLM-powered Q&A using Gemini API and open-source models (Mistral, Phi-2)
- Deploying a searchable UI with Streamlit — from messy PDFs to production-ready AI

Skills: Python · RAG · LLMs · OCR · Vector Search · LlamaIndex · FAISS · Gemini API · Document Intelligence · Applied AI

gWorks

Software QA Test Engineer

September 2024 - April 2026 (1 year 8 months)

Nebraska, United States

Built scalable automation workflows using Playwright (TypeScript, POM) to validate complex web, API, and backend systems—laying groundwork for ML-driven quality and reliability pipelines.

Designed custom automation utilities and data pipelines to streamline release workflows and support model-ready data generation.

Integrated AI-assisted tools (MCP, Cursor AI) to accelerate script creation, environment checks, and analysis, improving development velocity and reducing manual overhead.

Contributed to SDLC planning, requirement analysis, and environment readiness with a focus on automation-first and AI-augmented processes.

Supported CI/CD automation via GitHub Actions, ensuring stable, reproducible execution environments for automated and AI-assisted workflows.

Collaborated with engineering teams on defect triage and root-cause analysis, using data-driven insights to improve system reliability.

Performed cross-system validation (Web, API, backend) to ensure data integrity—experience directly transferable to AI model evaluation and pipeline monitoring.

iD Tech Camps

Software QA Engineer

August 2022 - April 2024 (1 year 9 months)

United States

- Worked in the Engineering Department to ensure Quality Control of the company's software infrastructure by performing rigorous testing at both front end and back end of critical applications.
- Designed test scenarios and executed test cases, handled high priority bugs from stakeholders
- Performed Functional Testing, Regression Testing, Smoke Testing, UAT, Database testing, API Testing using Swagger, Security testing, Accessibility testing for visually impaired.

- Used Jira for Manual testing management and tracking purposes.

Tools Used: Jira, Confluence, TestRail, Swagger, Excel, Windows 10

Mirza Health Care

Software Engineer

November 2014 - June 2015 (8 months)

Villa Park, Illinois, United States

- Played key role in client's Website design. Helped develop Inventory Management Software. Involved in fixing priority bugs and functional requirements, which improved the company revenue by 7%.
- Involved in various phases of Software development life cycle such as requirements gathering, modeling, analysis, design, and development.
- Coordinated with Business Analysts/ IT team to understand the business needs, implement the same into a functional design and ensure the quality of the applications designed through rigorous test case execution.

Tools Used: WordPress, VB Studio, SQL, MS Powerpoint, MS word, Google Docs, Dentrix.

Vemana Institute of Technology - Koramangala, Bengaluru

Software Engineer Intern

September 2011 - March 2012 (7 months)

Bengaluru, Karnataka, India

Details:

- Assisted in developing an Augmented reality app on an iOS device for the college.
- Performed requirement analysis, designing user stories, test scenarios, test case design.
- Test case execution, UI design, testing code with Root cause analysis and System testing.
- Performed rigorous iPad (Tablet) app testing white box and black box testing including Regression testing, Compatibility testing, End to End Testing, Integration testing.

Tools: XCode, CloudFoundry, Vuforia SDK, MS Word, MS PPT

Education

Robert Morris University - Illinois

Master's degree, Information Systems (Software Engineering) · (2013 - 2015)

The University of Texas at Arlington

Master of Science - MS, Computer Science · (January 2012 - August 2012)

Visvesvaraya Technological University

Bachelor of Engineering - BE, Computer Software Engineering · (September 2008 - April 2012)

IOU/ VIT

· (2008 - 2012)

Visvesvaraya Technological University

Bachelor of Engineering - BE, Information Technology · (2008 - 2012)
